

Save energy and money for your business

Our programs can help your business grow while reducing energy use and maximizing your savings. Whether you are a small or large business owner, we are here to help. When you install energy efficient equipment, we can provide rebates that offset your initial costs. Plus you'll save money on your energy bill and realize other benefits in the long term, like increased productivity and reduced maintenance.

Receive rebates for updating:

- **Lighting** – Upgrade your existing, outdated lighting to energy efficient LEDs. Occupancy sensors and central lighting controls also qualify for rebates.
- **HVAC** – Install unitary and split air conditioning systems and receive rebates based on unit size. Air or water-cooled chillers also qualify.
- **Building automation systems (BAS)** – Install web-based BAS and web-based thermostats to qualify for a rebate based on the area controlled.
- **Variable frequency drives (VFD)** – Upgrade existing motors with VFDs and earn rebates calculated from the controlled motor size.
- **Other equipment** – Receive cash rebates for installing energy efficient infrared heaters, space heating boilers, furnaces, ice makers, pool heaters and more! See our catalog for a full list of measures.

Have you asked for your rebate?

5 easy steps to help your business save money!

1 Download the application

Explore available rebates and find our incentive application at ConsumersEnergy.com/startsaving.

2 Complete the pre-application

Fill out page 6 (Applicant Information), plus the pages with measures relevant to your project and then send your pre-application to our program staff through mail or email. Include specification sheets detailing model numbers for the new equipment you plan to install.

3 Wait for funds to be reserved

The Consumers Energy team will review your project, determine eligibility and reserve program funds for up to 90 days.* Once you have received your reservation notice, you can begin your energy efficiency project.

4 Complete the project and final application

Submit the final application within 60 days of your project's completion to receive your rebate check.** Include page 7, a copy of your W-9 and invoices detailing equipment model numbers and quantities.

5 Receive your check

Once your final application has been reviewed, your check will be processed and mailed. It may take up to eight weeks to receive your rebate check.

* Program funding is limited. Rebates are paid on a first-come, first-serve basis until funds are exhausted for the program year.

** Submit the final application within 60 days of completion or reservation end date, which ever comes first.
